

12.10.21

Dear parents and carers,

As you are all aware, we provide every student with a Chromebook to enable them to access and complete our online learning programmes. These programmes are designed to enable all our students to develop strong foundational knowledge that they can use to access and complete more demanding work in lessons.

We understand that currently there are a few issues around accessing and saving homework and this has led to a few parents feeling that their child has been issued with a detention that is outside their child's control.

We are aware of the problem at a general level but in order to help us understand the precise issue we are inserting a QR code and a link below to a MS Form where you can log the issue and we can then provide the solution for your individual child.

[Homework and technology form](#)

We hope that this reassures you and ensures we can solve any problems you might be experiencing.

With best wishes

Oliver Knight
Principal
